# Task 2 - Employee Management System

## 📌 Objective

Develop a web application that allows administrators to perform **CRUD (Create, Read, Update, Delete)** operations on employee records.

Ensure the system has proper validation and authentication mechanisms to protect sensitive employee data.

## 📌 Features

📖 README

- Employee Management (Create, Read, Update, Delete)
- Input Validation for secure data entry
- Role-based Access Control (Admin / User)

- Protected Routes (only accessible after login)
- Mobile-friendly frontend (Login & Dashboard)

## Tech Stack

- **Backend:** Node.js, Express.js
- **Database:** MongoDB with Mongoose
- **Frontend:** HTML, CSS, JavaScript
- **Security:** bcryptjs for password hashing, JWT for authentication

## How to Run

1. Clone the repository

```
git clone https://github.com/YOUR_USERNAME/PRODIGY_WD_02.git
```
